

why our talent goes further.

We know that in our industry if you are not moving forward, you are moving backwards. We listened to our contractors in our quarterly Peakon contractor engagement surveys.

It's clear that access to professional development ranks highest on the list of desires of our talent.

Our new partnership with Udeemy Business provides you with access to more than 14,000 courses across 14 languages that can be accessed at any time, anywhere. With a plethora of content on topics such as Cloud Computing, Data Science, IT Operations, Leadership & Management, Personal Development and many others, your own path to personal growth is only a click away.

Across AWS, Microsoft Azure and the Google Cloud platform, complete specific certifications, and advanced technical courses or simply develop critical soft skills in your personally curated learning paths. All the tools and knowledge are at your fingertips, helping you climb the ladder, regardless of your current career standing.
